The motors powers in this catalogue are expressed in S6, except where otherwise specified.

In this catalogue, machines are shown in CE configuration and with options.

We reserve the right to modify technical specifications without prior notice, provided that such modifications do not affect safety as per CE norms.

circular
saw
formula s 40

High quality construction
to perform professional work.

A with 3200 mm carriage	mm	7250
B with 1000 mm cutting width with rip fence	mm	4780
B with 1270 mm cutting width with rip fence	mm	5050
B with 1500 mm cutting width with rip fence	mm	5280

S Standard
O Option

formula		s 40
Squaring capacity	mm	3200
Stop on fence for squaring cuts extendable up to	mm	3200
Standard cutting width with rip fence	mm	1270
Main saw blade diameter (hole)	mm	400 (30)
Scoring blade diameter (hole)	mm	120 (20)
Max. saw blade projection from the table at 90°	mm	140
Max. saw blade projection from the table at 45°	mm	99
Saw blade speed	rpm	3700
Scoring blade speed	rpm	8500
Saw blade tilting	degrees	90 ÷ 45
Exhaust outlet diameter at base	mm	120
Exhaust outlet diameter on blade protection	mm	80 (60 NON CE version)
Motor power with direct start (standard)	kW	7
Motor power with automatic star-delta start (option)	kW	9
Standard features and main optional devices		
Automatic motor brake on main blade (only CE version)		S
Device for angular cuts		O
Device for angular cuts with self-adjustment of the stop position		O
Device for rip cuts		O
Overhead saw blade protection (optional device for NON CE version)		S
Cutting width on rip fence 1000 mm or 1500 mm		O
"M" version with 3 saw blade rotating speeds and powered unit lifting and tilting		O
"M Plus" version with 3 saw blade rotating speeds, automatic rip fence, mobile control panel and 9 kW motor		O

circular saw operating groups

Smooth movement and sturdy support surface

Saw carriage

The circular saws carriage of the **formula line** utilizes a sliding system on aluminum stiff profiles with hardened steel guides using an exclusive method of mechanical fixing. This allows a straight line precision of +/- 0,05 mm along the entire carriage length. The **best precision** is guaranteed **overtime** even with intensive use and **without maintenance**.

Sturdy structure

Saw unit

A large structure, an hardened cast iron work table and an innovative operating unit prevent vibration to ensure excellent finishing. The height adjustment on round guides ensures smooth movements even after years of use. The controls on the machine front and therefore in an easily accessible position by the operator guarantee a **further saving of time in the preparation process**.

Simple and effective

Scoring unit adjustment

The scoring unit is moved vertically and horizontally through a lever system which ensures the complete **absence of play**. This system also enables **quick positioning** thus limiting the need of sawing tests.

Optimal support

Large squaring frame

It enables the squaring of panels up to 3200 x 3200 mm. It is fitted with a guide complete with two reversible stops and an idle roller to facilitate the loading of large panels. The guide also allows angular cutting up to 45°.

circular saw optional devices

Angular cutting device
equipped with:
- telescopic fence with two
reversible stops
- preset for angle rapid selection

Device for angular cutting with automatic self-adjustment of the stop position with respect to the blade
Each time the cutting angle is adjusted so that the distance between the stop and the blade remains constant. This enables rapid set-up and reduces test cutting.

Rip cutting device
Particularly useful for trim cuts on long work pieces.

circular saw optional devices

Electronic readout for rip fence position

Reading system on magnetic band and possibility of relative and micrometric adjustments.

Powered rip fence with electronic positioning

Easy and precise positioning from numeric keyboard and by pushing a button, the fence rapidly reach the requested position which is visualized on the electronic display.

Three saw blade rotating speeds

The speed change can be made easily from the opening on the work table.

"M" and "M Plus" version

Overhead saw blade protection

Fitted in a tilted position it increases the useful cutting width to the rip fence and guarantees the maximum flexibility.

surface planers

formula f 2

formula f 1

Perfect surface, practical and ergonomic
Both models feature long, cast-iron work
tables and a large anodised aluminum
fence. An optimum **high-quality finish**
is guaranteed even on large size work
pieces.

formula f 1

formula f 2

Automatic star-delta start		O	O

planers operating groups

formula line thicknessers are renowned for their strength.

The operating unit with a four-knife cutter block guarantees a high-quality finish. An infeed roller with helical grooving and a rubber coated outfeed roller ensure efficient and smooth work piece feed.

Surfacing fence

The fence is mounted on a precision mechanism enabling accurate angle adjustment from 90° to 45°.

High quality finish

Work tables made from ribbed cast-iron
The ribbed work tables structure with the feeding by means of a parallelogram mechanism on connecting rods always gives the same distance between the cutterblock and the table. This enables a quick and easy adjustment of the stock removal rates. The strong cast-iron structure of the cutter block with 4 knives grants optimal finish and absence of vibration.

formula f 1, formula f 2

Sturdy structure with precision

Work table lifting

The ground, cast-iron work table is mounted on four recirculating ball screws simultaneously driven by a chain guaranteeing the **best working stability**. The machines are equipped with electric adjustment as standard feature; a solution offering **ease-of-use, precise and rapid set-up**.

formula sp 1, formula sp 2

Ease-of-use

Control system

All the controls are in an ergonomic position on the front of the machine such as the feed speed selector, the electric work height adjustment and a mechanical digital readout of working height.

formula sp 1, formula sp 2

planers optional devices

Simple and rapid “Tersa” cutterblock with throwaway knives

Automatic knives clamping by means of the centrifugal force ensures **safe and precise machining**. The system, without fixing screws makes knives substitution extremely fast.

The specific knives fixing system to the cutterblock eliminates the setting up times.

Easy cutter block knives introduction.

Knives self-locking at the machine starting thanks to the centrifugal force. The automatic projection of all knives is perfectly adjusted.

Quick knives substitution by gibs unlocking.

“Xylent” cutterblock

The 3 spiralknives give an **exceptional finish**. **Reduced noise** during machining provides a more comfortable working environment. It also improves the dust extraction due to the production of very small chips. Each cutter has 4 tips which can be rotated into the cutting position when worn. Therefore increasing the production life of the cutter block before knives require replacement.

The **thickening work table** can be equipped with two rollers to **optimise work piece feed and throughput**.
formula sp 1, formula sp 2

Maintenance case for “Xylent” cutterblock

Complete with:

- 1 cleaning/degreasing liquid bottle for the resins cleaning
- 1 set dynamometric key
- 2 bit Torx
- 10 inserts
- 5 screws
- 1 brass bristle brush to clean the spindle with mounted in inserts
- 1 steel bristle brush to clean the inserts housings

Third feed roller

This is a powered, steel or rubber-coated roller designed to ensure perfect work piece feed with any type of wood.

formula sp 1, formula sp 2

spindle moulders
formula t 70f
formula t 60f

High performance and very high reliability with precise and flexible operations and flexibility.
Rich equipment, for example the dedicated versions for moulding and tenoning.

spindle moulders versions for tenoning and moulding

Simple working

Carriage on work table for small tenoning jobs

Ideal for tenoning of small work pieces for versions without sliding carriage. Mitre cuts with angles of a $\pm 60^\circ$ on the work table are possible. Easy fitting and removal due to the fixing system on the work table.

Ideal for long work pieces

“LL” version

The “LL” version is available with two side table extensions and an extractable front support table, for increased **safety and more precise machining of long and heavy profiles**. The cast-iron tables have a **ground surface to guarantee the maximum flatness**.

t 60f “TL”
in CE version
(machine with
options)

Precision and stability in machining

“T” and “TL” versions

The “T” or “TL” versions meet the special requirements of door and window machining. The table extension for large work pieces (“TL” version) provides a larger support surface. For precision tenoning, the machine has a sliding table which runs easily on axial bearings on a hardened, ground bar.

The table has a large support surface and it is complete with a $\pm 45^\circ$ tilting fence and incorporates a cam lock clamping device. The tenoning version has special safety devices, such as arm guards and a dedicated hood which allows the use of tools with a diameter of up to 350 mm.

spindle moulders optional devices

Very quick and simple Set-up Spindle fence with movement by handwheel

The entire fence has continuous linear adjustment by means of a single handwheel. This handwheel provides adjustment to the infeed and outfeed fence independently. Movements are displayed by mechanical digital readouts. The side handles make it easy to remove the guide from the work table.

Anodised aluminium guides with "T"-shaped upper groove for insertion of stops during interrupted machining. It is complete with connecting bars for a maximum supporting surface area close to the tool.

Spindle reverse rotation
for even more flexible use.

Interchangeable spindle with MK4 fitting on t 60f and MK5 on t 70f for using tools with different hole diameters thanks to the possibility of rapid changing of the spindle.

The best support for the work piece

"Fast" sectional table

It substitutes rings and allows maximum support for the work piece being machined. The table can even be adjusted after the tools have been fitted. Applying a table segment behind the spindle used for machining it guarantees very efficient extraction. For formula t 70f only

Perfect results

Blade guide

A perfect cut result is assured by the top and bottom high precision blade guides. Practical machines suitable also to perform straight and tilted cuts on wood, plastic and aluminum.

Safety first

Protections

Total safety machining with telescopic protections with rackwork to the blade.

Solidity and sturdiness

Cast iron saw wheels

Very thick, cast iron wheels, as well as the work table, running on sealed for life ball bearings.

radial saws operating groups

Long-lasting functionality
Column protection cover
The mechanisms of which the machine is equipped, as the protection cover on the arm column support, protect the mechanical parts from dust, guaranteeing the best operation over time.

Precision and smoothness
Carriage with 8 bearings
The 8 sliding bearings on the guides grant the best carriage smoothness and an optimal support for a perfect cutting result.

Absolute safety
Blade guard
It guarantees the absolute operator's safety.

Maximum cutting precision
Cast iron arm with steel interchangeable guides
The cast iron structure provides the arm the maximum solidity and rigidity for the maximum cutting precision. The interchangeable sliding ways allow the operator a simple and rapid replacing, in case of wear, without direct intervention on the arm.

Transversal stroke	mm	125
Tool spindle diameter	mm	1 ÷ 16
Spindle speed	rpm	3000

horizontal mortiser operating groups

Solidity and manageability

Cast iron structure and sliding on cylindrical bars

Solidity and easy to handle with the cast iron strong structure which easily moves on cylindrical sliding bars.

Ease-of-use

Hand-wheel and levers

Easy movement of the boring head due to the practical control by hand-wheel and levers.

vacuum dust extractors

formula vf 140

formula vf 200c

formula vf 250

formula vf 300

The vf series of the vacuum dust extractors are specially designed to work inside the workshop guaranteeing a **level of dust emissions lower than 0,1 mg/m³**. Thanks to their slim design and the possibility to connect multiple machines, they can completely replace the traditional suction system.

Constant effectiveness

The top-of-the-range models (vf 250 and vf 300) are equipped with a inlet pre-chamber, thanks to this only the thin chips comes into contact with the sleeve filters while the larger chips are decanted and fall directly into the baskets. A simple but extremely effective solution.

vacuum dust extractors operating groups

Risk preventing

The fan is positioned at the end of the filter, far away from the high risk of explosion zone.

Practicality at first place

All dust extractors within the vf series comes with one or more baskets to collect the sawdust. They are very easy to move thanks to the wheels.

Absolute performance

The vf 140 and vf 200c dust extractors are equipped with cylindric cartridge filters to reduce the machine overall dimensions, the vf 250 and vf 300 dust extractors use sleeve filters for the best filtering and cleaning efficiency.

clamp operating groups

Ease-of-use

Hydraulic cylinders

The simple and rapid vertical beams positioning system allows a very simple hydraulic cylinders adjustment.

Solidity and sturdiness

Lower cast iron supports

Even more machine sturdiness with the lower cast iron supports.

Pressure under control

Control panel

The hydraulic cylinders pressure is controlled by practical levers and a control panel which is equipped with a valve with reading monometer and a locking cock for the cylinders pressure maintaining. The process is always under control.

THE STRONGEST WOOD TECHNOLOGIES ARE IN OUR DNA

SCM. A HERITAGE OF SKILLS IN A UNIQUE BRAND

Over 65 years of success gives SCM the centre stage in woodworking technology. This heritage results from bringing together the best know-how in machining and systems for wood-based manufacturing. SCM is present all over the world, brought to you by the widest distribution network in the industry.

65 years history

3 main production sites in Italy

300.000 square metres of production space

17.000 machines manufactured per year

90% export

20 foreign branches

350 agents and dealers

500 support technicians

500 registered patents

In SCM's DNA also strength and solidity of a great Group. The SCM Group is a world leader, manufacturing industrial equipment and components for machining the widest range of materials.

SCM GROUP, A HIGHLY SKILLED TEAM EXPERT IN INDUSTRIAL MACHINES AND COMPONENTS

INDUSTRIAL MACHINERY

Stand-alone machines, integrated systems and services dedicated to processing a wide range of materials.

WOODWORKING TECHNOLOGIES

TECHNOLOGIES FOR PROCESSING COMPOSITE MATERIALS, ALUMINIUM, PLASTIC, GLASS, STONE, METAL

INDUSTRIAL COMPONENTS

Technological components for the Group's machines and systems, for those of third-parties and the machinery industry.

SPINDLES AND TECHNOLOGICAL COMPONENTS

ELECTRIC PANELS

METALWORK

CAST IRON

PROMPT AND EXPERT TECHNICAL SUPPORT THROUGH A NETWORK OF 1000 TECHNICIANS AND AN INVENTORY OF 36,000 SPARE PARTS.

HIGHLY SPECIALISED TECHNICIANS, EFFICIENT
MANAGEMENT AND 6 SPARE PARTS BRANCHES
AROUND THE WORLD GUARANTEE A CLOSE,
SAFE AND EFFECTIVE TECHNICAL SUPPORT.

SERVICE

SCM provides a service that goes beyond the purchase, to guarantee the long term performance of your technological production system and peace of mind for your business.

A COMPLETE RANGE OF AFTER-SALES SERVICES

- installation and start-up of machines, cells, lines and systems
- tailored training programs
- telephone support to reduce times and costs when machines are not working

SPARE PARTS

SCM Group can count on 140 spare parts professionals worldwide to meet any request with real time shipments.

36,000 SPARE PARTS

Our spare parts inventory, with a value of 12 million euros, covers every single machine

SPARE PARTS GUARANTEED

We guarantee also hard to find parts, with 3,5 million euros invested in "critical" spare parts.

IMMEDIATE AVAILABILITY

Over 90% of orders received are carried out the same day thanks to the huge inventory available.

6 BRANCHES AROUND THE WORLD

The spare parts service can count on worldwide support (Rimini, Singapore, Shenzhen, Moscow, Atlanta, São Bento do Sul)

500 SHIPMENTS A DAY
