

stefani x ELECTRONIC TOUCH AT YOUR FINGERTIPS

SCM presents **stefani x**, the new industrial edge bander designed to offer the highest quality of processing on any type of panel and material and to fully meet the needs of a **digital, connected and integrated factory**.

Highly configurable and customisable edge bander, designed to reliably work on multiple shifts and able to offer **excellent processing quality**, both in the stand-alone version and integrated in edgebanding cells or lines.

WATCH THE VIDEO

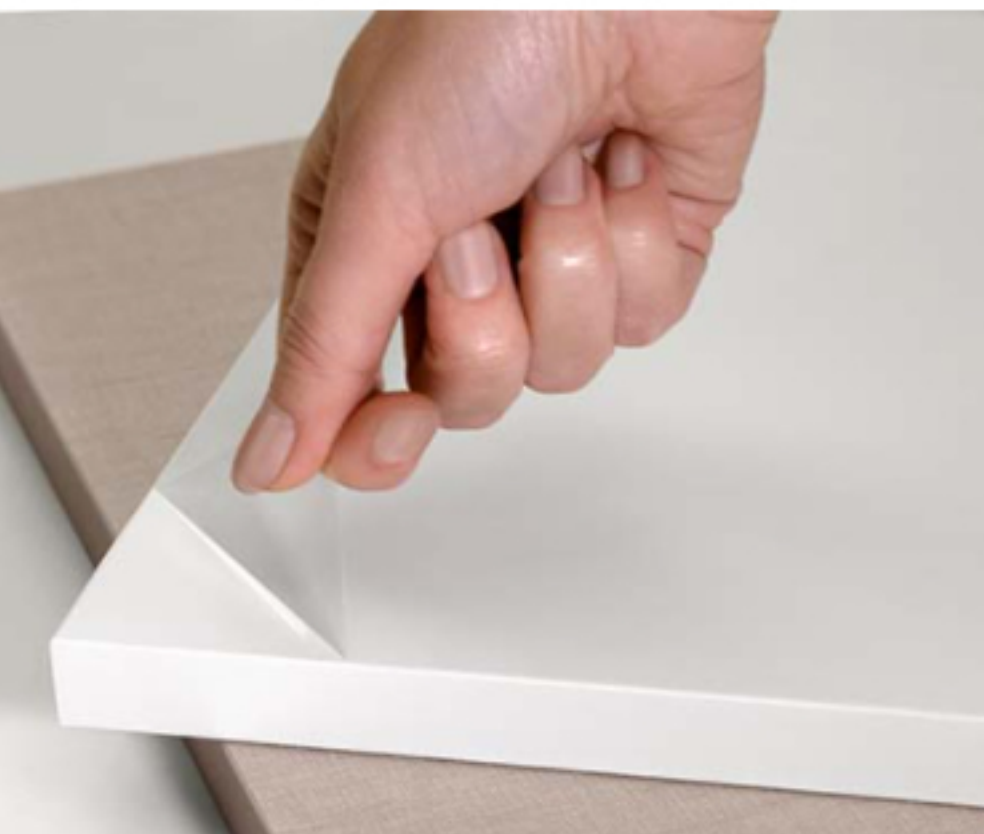

INNOVATIVE

Always the best quality thanks to the **"Glue Switch"** system that allows a **"just in time"** glue change to optimise the colour of the glue and the panel.

FLEXIBLE

Processing of panels with various film thicknesses thanks to the high-tech "Multileaf" glue scraper and the **automatic HMI set-up of the units**.

ELECTRONIC

Excellent finishing quality on all types of materials, even the most delicate and latest generation ones, thanks to the **"Electronic Touch technology"**.

And much more with stefani x that always ensures **first-class performance**:

- **top-class edgebander reliability** that always does what you expect, with uncompromising construction solutions, an extremely rigid structure and high-end units;
- **multi-shift industrial productivity** with speeds of up to 30 m/min and gaps between panels reduced to 350 mm;
- **exclusive solutions** such as the ACC System for the **automatic cut correction** and wide configuration of gluing technologies.
